

Valve Control Systems

Used in both construction and agriculture equipment. The system can be custom designed for new applications, or for replacing an old system with more modern and efficient parts. In addition, Orscheln offers products manufactured by Indemar Industriale in order to offer our customers a complete valve control system. F.A.S.T.® distributors can custom make the valve cable and supply the system.

A Valve Control System =

- Lever Control: Single or Dual
- HP Control Cable(s)
- Valve Connection Kit

Dual Axis Joysticks

Our Dual Axis Joysticks can be used in various applications. Offered in both light and heavy duty variants, these joysticks are designed with comfort and durability in mind. Available in both standard or custom manufactured

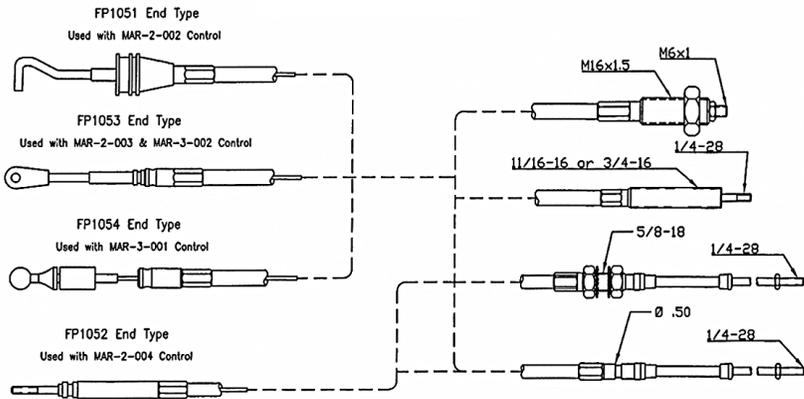

Dual Axis Joysticks

Single Axis Levers

Control Cable Ends

Single Axis Levers

Single Axis Levers are primarily used for valve applications, but can also be fitted for gearbox and hydraulic pump applications. Our Single Axis Levers have various locking options and customizable lever lengths.

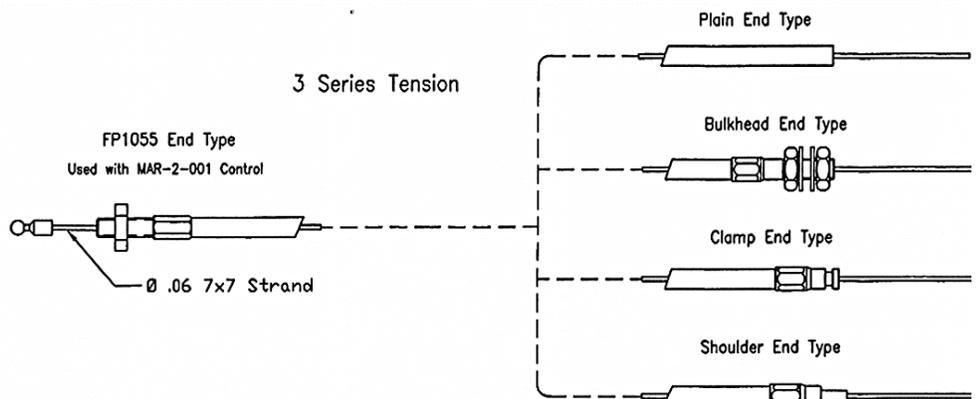

MAR-2-001

This lever is primarily used for throttle applications

Valve Control Connection Kits

Orscheln PN	Description
MAR-4-001	Kit DINOIL DN-BLB
MAR-4-002	Kit DINOIL DN-BLB
MAR-4-005	Kit SALAMI VD06
MAR-4-006	Kit SALAMI VD8B
MAR-4-019	Kit BUCHER HDM 18
MAR-4-024	Kit VALNOVA
MAR-4-027	Kit WALVOIL SD 4/5/6
MAR-4-049	Kit HYDROCONTROL HCD4

Valve Control Cables can be custom assembled by local Orscheln F.A.S.T.® distributors
